SUMMARY

Ambitious, career-focused job seeker, anxious to obtain an Job to help launch career while achieving company goals. I am eager to kickstart my career and contribute positively to a forward-thinking organization. As a responsible and motivated student, I approach every task with dedication and enthusiasm, always seeking to learn and grow.

PROJECTS

SafeDrive Guardian

The Safe Drive Guardian project is a pioneering initiative aimed at enhancing road safety by leveraging advanced technology to detect and mitigate driver drowsiness. Using computer vision techniques and machine learning algorithms, the project monitors driver behavior and facial cues in real-time to identify signs of drowsiness, such as eye closure and head nodding. Upon detection, the system activates timely alerts, such as alarm sound to prompt the driver to take corrective action or pull over safely. Through rigorous testing and validation, the Safe Drive Guardian project has demonstrated promising results in reducing the risk of accidents caused by driver fatigue. This innovative solution underscores our commitment to leveraging technology for the greater good, ensuring safer roads and preventing potential tragedies due to drowsy driving."

THRIFT SHOP

Web Development - Mini Project
Embrace the joy of thrifting, as you browse through a wide selection of high-quality used goods, uncovering hidden gems while promoting greener, more sustainable lifestyle.
